CPSC 100

Computational Thinking

Artificial Intelligence

Instructor: Firas Moosvi
Department of Computer Science
University of British Columbia

Agenda

- Project Milestone 2

- Persuasion and AI

- AI mini-debates

Course Admin

Project Milestone 2

In this milestone, students will put together a project proposal of their area of inquiry.

Students will:

1. Choose a topic that fits into one of the five broad themes (specified above),

2. formulate specific questions to guide their exploration of the selected topic.

3. identify at least three substantial online sources that will provide data or information relevant to their topic.

Project Milestone 2

- Due date: Monday Nov. 3rd at 6 PM

- Open on PrairieLearn by Friday's class

Project Milestone 2

All requirements listed below are per group member !

	C	B	A	A+
Topics Covered	• 4 course topics	• 5 course topics	• 6 course topics	• 8 course topics
Aesthetics & Visualizations	• No relevant and substantial visualizations present • No effort made on aesthetics	• Minimal relevant and substantial visualizations present • Minimal effort made on aesthetics	• Several relevant and subsantial visualizations • Significant effort made on aesthetics	• Originally-created and/or extremely high quality sourced visualizations • Significant effort made on aesthetics
Complexity & Sophistication	• Simple research questions	• Sophisticated research questions	• Deep and complex research questions • Analysis and commentary	• Deep and complex research questions • Deep analysis and insightful commentary • Extra flair and effort
Cohesiveness	• Separate reports for students • Mini projects for each student	• Single report with disparate topics • Minor spelling and proofreading	• Single report with all topics closely related	• Single report with all topics closely related • Coordinated styling
Effort & Group Dynamics	• Imbalanced workload distribution	• Reasonable workload distribution	• Equitable workload distribution	• Equitable workload distribution

AI and Persuasion

AI and Persuasion

AI Debate

The AI Debater will hold a intelligent debate with you on nearly any topic. Test your debating skills against the AI!

AI and Persuasion

What features/traits would make a human better than an AI at persuasion?

AI and Persuasion

What features/traits would make a human better than an AI at persuasion?

What about the reverse?

AI
Mini-Debates

Prompt:

"AI tools should not be available to people under the age of 13."

Prompt:

"AI companies should prohibit people from using AI tools for information that is easily found other ways."

Prompt:

"Chip companies should equitably sell GPUs to countries around the world (instead of to the highest bidder)."

Wrap up
